1.2 Another Section

This is some more text, “this should be printed in fancy quotes” if supported.

This text is monospaced, and for some reason seems to be setting the the left margin incorrectly for following text. I’m not sure why this is.

Here is a unordered list. I think, due to the text above, the left margin is shifted slightly right for text following a monospaced section. Weird.

- Item 1
- Item 2
- Item 3
 - Subitem 1
 - Subitem 2

And a numbered list

1. First Step
2. Second Step
3. Third Step

A bit of source code, numbered and highlighted in HTML variants

```
#!/bin/bash

echo "this is a test";

for file in *; do
    echo $file;
done;
```

1.3 Section with subheadings

1.3.1 Main topic

Here’s the topic for this section.

1.3.2 Secondary topic

More information

2 A top level item

This is a discussion of something new and different. I wonder how it'll be treated.

3 another top level item

This is more text

4 still more top level items
